# P/2 DA4 Plus and P/2 DA6 Plus

The P/2 DA4 Plus and P/2 DA6 Plus are VGA/XGA/UXGA Distribution Amplifiers that accept a video signal from a VGA, XGA, or UXGA compatible computer and distribute that signal to separately buffered outputs. Each output can be extended with Extron's VGA-HR cables up to 250'.

Installation

1. Turn **Off** the PC computer and local monitor.
2. Connect the input cable of the distribution amplifier (DA) to the computer's VGA/XGA/UXGA output.
3. Connect the computer's monitor to the "Local Monitor" output of the distribution amplifier.
4. Connect a VGA-compatible monitor(s) or a projector to the output(s) of the DA.
5. Turn **On** the PC computer, local monitor, and other display device.
